Software Change Management for CA Plex and CA 2E Modelmanagement for CA Plex and CA 2E - MKS-CM Connector with Model Management	MatchPoint SCM is making use of the new CA Plex 6.1 API's and the ability to call add ins directly from the CA Plex object browser. In this session all the new features in MatchPoint SCM are presented, including checking in and out objects directly from the object browser, showing the update history of single model objects as well as showing change request information directly from the CA Plex model. This tight integration of MatchPoint SCM with the CA Plex model is providing great change management features for any CA Plex environments.	14:00	Christoph Heinrich, CEO CM First AG		
New User Group in Italy ?	New User Group foundation	14:30	Carlo Cappelli / Arthur Häberli		
Coffee		15:00			
CM First as CA Plex and CA 2E Partner in Italy	Introduction of CM First as Partner for CA Plex and CA 2E Partner for italian companies	15:30	Christoph Heinrich, CEO CM First AG		
CA 2E Modernization – M3 Version 2.0	The latest version of M3 modernization has higher automation and quality, giving you the ability to turn your 2E COBOL and RPG into modern web-based application environments using Java. See a live end to end example of modernization. This presentation will touch on two related subjects Do you need to quickly develop comprehensive technical documentation of your 2E model, to support audit, package implementation, or modernization? This technology may be what you are looking for. Automated regression testing saves time and money, and can dramatically improve quality and help meet audit requirement. Worksoft Certify has special adapters for CA Plex that make this a unique offering, for both standard and modernization customers	16:00	John Rhodes, Product Manager ADC Austin		
End		16:30 16:35	Carlo Cappelli / Arthur Häberli
